Subject: Release at CES

Hi Beth and Maria,

Just got off the phone with Terry, and there was a release at CES due to heavy rain. HPD got a complaint about oily water in the area, and put up berms to keep it from migrating and stabilized the situation. It is estimated that about 6,000 gallons of an oily substance were released, and it appears that secondary containment around the tank farm may have been breached. Terry went to the site tonight and will meet again with Faith Cotton of Region 12 ER at 8:00 am tomorrow to further assess the situation. EPA Region 6 has been apprised of the situation, and they had been planning a removal action to occur in the next few weeks.

Channel 11 was at the scene-here is the news clip:

Chemical leak in SE
Houston has neighbors
thinking about evacuating

A chemical leak from an abandoned waste disposal facility has neighbors in one southeast Houston community thinking about evacuating.
